

DENNIS SHEM O. LIMO

AI Data Evaluation • Data Annotation • Analytical Research • Technical Communication

Email: shemdennis5@gmail.com Phone: +254 721 877 088 LinkedIn: [linkedin.com/in/dennis-limo](https://www.linkedin.com/in/dennis-limo)
Location: Nairobi, Kenya (Fully Remote-Ready • Global Timezones)

PROFESSIONAL SUMMARY

Analytical Computer Science graduate (Maseno University) and certified Data Science & AI professional (Moringa School) with over 5 years of remote freelance experience delivering rigorous data evaluation, annotation, academic research, and technical documentation. Adept at breaking down complex multi-domain problems, evaluating model reasoning steps, validating factual accuracy, and constructing structured, high-quality written feedback loops for machine learning datasets. Proven record of disciplined asynchronous collaboration, rigorous quality assurance, and meticulous attention to detail under strict rubric guidelines.

CORE COMPETENCIES & EVALUATION SKILLS

Data Annotation & Evaluation:	Text & Multimodal Data Annotation, Ground-Truth Labeling, Fact-Checking, Hallucination Auditing, Quality Assurance (QA)
Critical Thinking & Reasoning:	Chain-of-Thought Evaluation, Logic & Fallacy Detection, Rubric-Based Scoring, Ambiguity Resolution, Multi-Domain Synthesis
Written & Technical Communication:	Expository & Technical Writing, Detailed Rationales & Justifications, Prompt Engineering Evaluation, Structured Critiques
AI & Data Science Domain Knowledge:	Supervised Fine-Tuning (SFT) principles, RLHF feedback mechanics, Python (Pandas, NumPy), SQL, Statistical Analysis
Remote Execution & Tooling:	Asynchronous Communication, Google Workspace, GitHub, Slack, Notion, Jira/Trello, Markdown, Time-Tracking Rigor

RELEVANT PROFESSIONAL EXPERIENCE

Freelance Data Analyst, Researcher & Evaluator — Independent Practice	June 2019 – Present (Remote)
- Analyze, curate, and annotate diverse qualitative and quantitative datasets across STEM, business, healthcare, and technology domains. - Conduct comprehensive academic and technical research, evaluating primary and secondary literature for logical consistency and empirical validity. - Deliver articulate, well-substantiated written reports, synthesize complex domain concepts into accessible prose, and author technical guidelines. - Perform systematic data auditing and cross-validation to identify anomalies, inaccuracies, and distribution skews across data pipelines. - Collaborate asynchronously with global clients and technical collaborators, consistently adhering to strict deliverable deadlines and specifications.	
IT & Systems Data Support Intern — State Department of Lands and Physical Planning	March 2025 – July 2026
- Executed rigorous data quality audits and verification checks on government enterprise records within IFMIS, resolving complex data entry discrepancies. - Identified systemic recording errors, authored standard operating procedures (SOPs), and trained staff on precise data capture protocols. - Maintained precise audit logs and documentation reflecting zero-tolerance standards for reporting errors.	
Clinical Data Research Analyst (Contract) — Healthcare Facility / Clinic Project	Approx. 1 Year (Remote/Hybrid)
- Curated and audited longitudinal clinical patient datasets focused on dengue fever trends, symptom severity, and diagnostic parameters. - Performed meticulous data cleaning, standardized categorical and numerical entries, and delivered visual and written trend evaluations to clinical teams.	
Field Network Engineer Intern — Net Mtaani	June 2023 – October 2023
Conducted methodical diagnostics on networking infrastructure, isolating physical and logical failure points through systematic testing.	

SELECTED ANALYTICAL & AI-ADJACENT PROJECTS

OrbitIQ — Multimodal Extraction & Academic Recommendation Engine	orbitiq-cic0.onrender.com
- Designed an OCR extraction pipeline parsing visual slip inputs, applying programmatic validation rules to correct character recognition errors. - Engineered deterministic decision logic calculating KUCCPS point thresholds and evaluating university program eligibility against complex rule sets.	
Domain Data Extraction, NLP & Classification Pipelines	Moringa School Capstones
- Built and evaluated machine learning and text processing models (TF-IDF, Scikit-learn, TensorFlow), conducting rigorous error analysis on misclassifications. - Constructed structured, balanced training and validation sets, defining annotation labels and feature engineering rubrics.	

EDUCATION & PROFESSIONAL CERTIFICATIONS

Maseno University — Bachelor of Science in Computer Science	2016 – 2021
Moringa School — Data Science & Artificial Intelligence Professional Certificate	2025
Cisco Networking Academy — Cisco CCNA & Introduction to Cybersecurity	2020 / 2026

WORK STYLE & ENGAGEMENT PROFILE

Engagement Type: Independent Contractor • Flexible part-time/full-time availability across global timezones.

Language Proficiency: English (Full Professional Proficiency — native-equivalent written and verbal fluency).

Work Ethic: High intellectual rigor, adherence to detailed annotation guidelines, rapid adaptation to project rubrics, and high-integrity feedback delivery.
